

Box framed glow in the dark posters

Short description:	Box framed glow in the dark prints – delivered ready to hang
Long description:	Available exclusively through Prodigi, our box framed glow in the dark posters are a truly unique print on demand option. Designed for graphic illustrations, abstract art and typography, this specialist paper has a beautifully soft texture and clean, matte finish. The finished result is a premium, gallery-style aesthetic by day, and a glowing statement piece after dark. Our advanced printing technology makes short runs easy, with no setup costs – so you can order one-off custom framed glow in the dark prints or scale up to larger quantities quickly. Read our setup guide on glow in the dark printing to prep your files, and note that areas defined as pure white or transparent will emit a luminous green-blue glow. To activate the effect, expose the print to around 30 minutes of bright or natural light before displaying it in a dark room. The more charge it receives, the brighter it glows, and it will gradually fade until recharged.
