

Eco canvas

Short description:	38mm satin canvas art prints – made from 100% recycled materials	
Long description:	Designed with sustainability in mind, our eco canvas prints are made using 100% recycled materials – from the canvas itself, created from recycled plastic bottles, to the lightweight internal frame and fully recycled packaging. They offer an environmentally conscious alternative to traditional canvas wall art, while being almost half the weight of wooden canvases—making them easier to handle and more cost-effective to ship. Available in a range of sizes, each piece features a neat black backing with an integrated hanging system, allowing your customers to mount their canvas quickly and easily – no tools required. An internal corner tension system keeps the canvas surface tight and structured, eliminating the need for visible folds and ensuring a clean, gallery-style finish.	
Features:	- 38mm stretched canvas print - 330gsm satin-finish canvas - Made from recycled plastic bottles - Stretched over a recycled frame - Shipped in recycled packaging - 4 edge-finishing options - Built-in hanging hardware
